Experience

OPTII SOLUTIONS   Austin, TX (Remote)
Senior Frontend Engineer / Pod Lead   Apr/2022 - currently
Development of hotel and housekeeping applications using React, TypeScript, GraphQl and Node.js.
Responsible for the frontend architecture of new modules; developing new features; writing tests for new features and for legacy code; code review. Creation of a new architectural pattern that helped reuse system modules faster and easier.

AB INBEV / ZX VENTURES   New York, NY (Remote)
Senior Frontend Engineer   Aug/2021 - Apr/2022
Development of e-commerce micro-frontend applications for Ab InBev's global team. Technical reference in the migration from the old service provider to the internal team. Responsible for assisting the team in the search for technical solutions for applications shared by stores in each country.

ITAGUAÍ CONSTRUÇÕES NAVAIS   Itaguaí, RJ
Full Stack Engineer   Apr/2018 - Aug/2021
Development of JavaScript applications (React/Node.js) using functional programming and agile methodologies.
Responsible for finding technical solutions to increase the front-end development speed.
Created a small framework to help backend engineers to implement the frontend of simple systems through JSON.
Jenkins/Docker deployment pipeline management..

LOJAS AMERICANAS S A.   Rio de Janeiro, RJ
Frontend Engineer   Sep/2017 - Apr/2018
Definition of the front-end architecture of the projects I participated in:
- LAIS Bot: chatbot developed using IBM Watson, Ms Bot Framework, Node.js and React.
The project involved an administrative system for registering responses (Java / MySQL / React), a BOT system (Node.js / MySQL / Ms Bot Framework / IBM Watson) and integration with Facebook Messenger.
- LAIS Notifications: proactive notification scheduling system for store managers based on sales information or errors in real time. The administrative interface was developed in React and the backend was developed in Java / MongoDB.

PROFIT-E - E-COMMERCE AGENCY   Rio de Janeiro, RJ
Frontend Engineer and Team Lead   Apr/2013 - Sep/2017
Frontend development, hybrid mobile applications, team management, deadline and effort definitions, development routines, team training, training Latin American development teams.
Direct contact with company customers, assistance to the commercial team for the preparation of budgets and technical validations, assistance to the project management team, participation in the creation of new products.
